

ABHIRADH GORTI

B.Tech Computer Science and Engineering Student

Vizianagaram, Andhra Pradesh, India | Phone: 9390479667 | Email: abhiradhgorti@gmail.com | LinkedIn: linkedin.com/in/[your-handle] | GitHub: github.com/[your-handle]

SUMMARY

Third-year Computer Science and Engineering student with hands-on experience building AI-driven and full-stack applications, including a contextual memory system (Synapse), an IoT-based wearable health monitor, and an AI commerce platform built for a hackathon. Comfortable across the stack: React, Node.js, MongoDB, and applied AI tooling including local LLM deployment, vector databases, and knowledge graphs. Reliable at owning a module end to end and documenting it properly (SRS, implementation plans, technical reports).

EDUCATION

Lendi Institute of Engineering and Technology, Vizianagaram, Andhra Pradesh 2023 - 2027

Bachelor of Technology, Computer Science and Engineering, 3rd Year

Registration Number: 24KD1A05C3

RELEVANT COURSEWORK

Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Automata Theory and Formal Languages, Software Engineering

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Web and App Development: React, Node.js, MongoDB, Redis, Socket.io, Vite, BLE connectivity

Artificial Intelligence and Machine Learning: Local LLM deployment with Ollama, MiniLM embeddings, ChromaDB, NetworkX

Computer Science Fundamentals: Automata Theory (DFA, NFA, CFG, PDA), Object Oriented Software Engineering, Data Structures

Tools: Git, Matplotlib, Microsoft Office

CERTIFICATIONS

- NPTEL Certification - Introduction to Internet of Things (IoT)
- NPTEL Certification - Social Networks

PROJECTS

Synapse - The Contextual Ghost - OS-resident contextual memory system

- Built an AI memory engine using MiniLM embeddings, ChromaDB vector storage, and NetworkX knowledge graphs, achieving [X]% retrieval accuracy across [Y] test queries.
- Designed a novel Stitching Score formula combining semantic similarity, temporal proximity, and dwell weight.
- Authored the Software Requirements Specification, full project report, and an IEEE-format research paper on AI-based contextual memory management.

SmartHealth Patch - IoT-Based Wearable Smart Health Monitoring Patch

- Served as Developer 1, delivering the front-end layer, mobile app, real-time health dashboard, and BLE connectivity for [X] wearable sensor(s).
- Authored a formal four-week Individual Implementation Plan for the front-end module.

Loom - AI Commerce OS - Team Lead, Unstop Hackathon Submission

- Led a four-member team to design an AI-driven commerce operating system concept extending the Synapse framework, supporting [X] core workflows/use cases.
- Built the pitch deck and abstract used for the hackathon submission.

Smart Price Comparison Engine - MERN Stack

- Built a full-stack MERN (MongoDB, Express, React, Node.js) price comparison platform with a REST API, aggregating pricing data from [X] sources for [Y] products.

ACHIEVEMENTS AND EXTRACURRICULAR ACTIVITIES

- Led a four-member team as Team Lead for the Loom AI Commerce OS submission at the Unstop Hackathon.
- Conducted a computer literacy session for students at Vignan Bharathi School.

SOFT SKILLS

Team Leadership, Technical Documentation, Problem Solving, Time Management, Communication

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge. - Abhiradh Gorti
